## EXPERIENCE

**Flatiron School** // Software Engineering  
Student

SEP 2019 - FEB 2020

- Learned full stack web development, created web projects from the ground up
- Refactored projects with D-R-Y and reusable code, comments for future developers
- Utilized Rails Docs, MDN, and StackOverflow for best practices to improve code
- Team building environment with peer-programing and collaborative projects
- **Utilized:** Ruby, Rails, Javascript, React, SQL, Trello, Git

**Vegfit** // Plant-Based Ecommerce  
Web Developer

JUL 2018 - AUG 2019

- Reproduced entire site & landing pages with pixel-perfect implementation from mockups
- Increased monthly online sales 20% after optimizing mobile experience with UX Designer
- Collaborated with designers in Sketch to bridge gap between design and implementation
- **Utilized:** HTML, CSS, JavaScript, WooCommerce, Mailchimp, Zapier & SEO

**Oliso** // Smart Home Products  
Web Developer, Marketing

OCT 2015 - NOV 2017

- Implemented Wordpress on product pages, and the Magento platform on shop pages
- Coordinated ad campaigns for Kickstarter project, exceeded goal with a total of \$112k
- Setup cross-channel workflows, synchronizing Zendesk, email software, and database
- **Utilized:** WordPress, Magento, Zendesk, IFTTT, Wufoo, GetResponse, Google Analytics

## PROJECTS

[Fetch](#) // Personalized News Experience

- Fetch news via Google API in topics users specify with customized parameters
- Users can remove articles from feed, which deletes article from db and state in React
- Share articles via iMessage and Email, auto-populates content with respective article
- **Utilized:** React, Google API, JSON Web Tokens, localStorage, Rails API

[JSPaint](#) // Online Coloring Book

- Developed with vanilla JavaScript front-end and Rails API backend
- Users can add/remove drawings from their profile
- **Utilized:** HTML Canvas, eventListeners, CSS, Rails API, Git, Heroku

[Movie Reviewer](#) // Rate & Critique Movies

- Application built solely on rails with full CRUD capabilities
- Reviews are a many to many relationship between users and pre-seeded movie data
- **Utilized:** Ruby on Rails, Embedded Ruby, PostgreSQL, Git, Heroku
